AZEEM SANUSI

Backend Engineer · Node.js · TypeScript · NestJS · PostgreSQL

Lagos, Nigeria • +234 703 348 6488 • bljazeem@gmail.com • devazeem.cv • linkedin.com/in/sanusi-azeem • github.com/azeem-py

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript, Node.js, NestJS, Express, Next.js, React, SQL, Python
Databases & Architecture: PostgreSQL (PostGIS), Redis, Prisma, TypeORM, RESTful APIs, WebSockets, Socket.io, Microservices
Payments & Security: Paystack, Stripe, PayPal, Distributed Locks, Idempotency, HMAC-SHA256 SSO, OAuth, RBAC, 2FA
DevOps & Tooling: Docker, Git, GitHub Actions, BullMQ, Jest, Supertest, Linux, Turborepo

WORK EXPERIENCE

Synergify Remote
Lead Backend Developer *Sep 2024 – Present*

- Architected production backend infrastructure across 5 core applications using NestJS, PostgreSQL, and Redis, sustaining 50,000+ monthly requests with 99.9% API uptime
- Engineered QR/NFC customer engagement POS engine with PostGIS geolocation, enabling real-time check-ins and offline data synchronization across 100+ active merchant venues
- Built multi-vendor marketplace platform supporting 50+ onboarded vendors with automated catalog sync, reducing average checkout response latency to under 120ms
- Designed rewards and loyalty platform processing points, cashback, and wallet redemptions via Stripe and PayPal, securing over $25,000 in monthly transaction volume
- Implemented multi-tier affiliate program with KYC verification and automated Paystack disbursements, reducing manual payout overhead by 90%
- Hardened payment pipelines with Redis distributed locks and idempotency keys, eliminating duplicate credit errors and race conditions across 100% of payment flows
- Created centralized single sign-on (SSO) utilizing HMAC-SHA256 service-to-service authentication, standardizing secure access across all distributed services

WooManager Remote
Backend Engineer (Contract) *Jan 2024 – Aug 2024*

- Engineered custom WooCommerce ERP integration service using NestJS, synchronizing 10,000+ catalog inventory items and reducing stockout mismatches by 95%
- Developed modular REST API endpoints and standardized React Query hooks, accelerating frontend dashboard load speeds by 40%

AffiliateBase Remote
Backend Developer (Contract) *Jul 2023 – Dec 2023*

- Built Django REST Framework backend with Next.js frontend integration, implementing bulk data ingestion pipelines that processed 5,000+ records in under 3 seconds
- Implemented server-side rendered (SSG) product pages, optimizing search indexing and driving a 30% increase in organic search traffic

Yurshorpe Remote
Software Engineer (Contract) *Apr 2023 – Jun 2023*

- Developed real-time buyer-seller messaging architecture using Firebase and WebSockets, facilitating instant chat delivery for 2,000+ active customer interactions

PROJECTS

Logos – Open-Source Collaborative Learning Platform Open Source
Creator & Full-Stack Developer *May 2024 – Jun 2024*

- Developed custom TF-IDF keyword extraction and search indexing engine, matching relevant educational feeds to users with 85% topic relevance
- Integrated Redis caching layer and optimized SQL joins, cutting query response times by 60% across high-volume community discussion threads

IssueFlow – Multi-Tenant Issue Tracking Platform issuefloww.vercel.app
Creator & Full-Stack Developer *Aug 2024*

- Architected full-stack SaaS issue tracker supporting multi-tenant isolation, role-based permissions, and custom kanban workflows using NestJS, React, and PostgreSQL
- Implemented optimistic UI state updates, tag indexing, and automated Web Push notifications, maintaining sub-100ms client interaction latency

EDUCATION

University of Ilorin Ilorin, Nigeria
B.Sc. in Statistics

- Final-Year Project: Engineered a hybrid recommendation engine utilizing TF-IDF and collaborative filtering, achieving 86% recommendation accuracy across test datasets
- Quantitative Coursework: Stochastic Modeling, Time Series Forecasting, Multivariate Analysis, Probability Theory, Linear Algebra, Statistical Inference

Languages: English (Fluent), Yoruba (Native) • **Interests:** Blitz chess & tournament analysis, tactical esports, non-fiction & literature reading
